### Steve Briganti, First CIO of the Navy, Joins AirPatrol's Federal Advisory Board

Columbia, MD – December 28, 2011 - [AirPatrol Corp.](#), a leader in wireless security, is proud to welcome Steve Briganti to its Federal Advisory Board.

Steve was the first CIO of the Navy and has served in a range of executive positions for over 20 years, from co-founding and growing successful technology startup companies and a cyber security non-profit to deploying billion dollar global network enterprises at government agencies for Fortune 200 companies.

“AirPatrol is happy to have Steve Briganti join our Federal Advisory Board,” stated AirPatrol’s Executive Chairman, Bradley Rotter. “Steve’s broad background and public-private experience will greatly enhance the strength of our team.”

President Barack Obama’s Executive Order and the SEC’s Directive on cyber security, mobility and cyber security drive government and corporations to dispel the fog of plausible deniability and make cyber security a functionality of conducting digital operations and business. AirPatrol’s wireless situational awareness, continuous monitoring capabilities and dynamic policy changes on all mobile devices, Wi-Fi and cellular, are currently used in federal agencies.

“Cyber-attacks are now complex, diverse and persistent. In response, AirPatrol has forged together a team of the world’s top experts in mobile intelligence. They have deployed ingenious and effective technologies that address convergence of the physical and cyber security ecosystems,” Briganti said. “I look forward to helping to drive AirPatrol’s solutions forward and contribute to the company’s overall success.”

#### About AirPatrol Corporation

AirPatrol is the first and only security company whose technology can continuously monitor any mobile device on cellular and Wi-Fi channels in an enterprise, determine its compliance with security policy, enforce the appropriate policy on the device in real time and dynamically empower the device’s capabilities for the situation regardless of who the user might be. AirPatrol offers a comprehensive suite of location-based management solutions that enable clients in the government, financial, healthcare, corporate and retail sectors to keep pace with the expanding security requirements of an increasingly mobile world.
