

FOR IMMEDIATE RELEASE

AIRPATROL LAUNCHES COMMERCIAL ADVISORY BOARD

Ken Tyminski, Information Technology Veteran Named Board's Chairman

Columbia, MD—April 7, 2010—AirPatrol Corporation, a leader in wireless threat management solutions, today launched its Commercial Advisory Board. The Advisory Board will provide the company's management team with strategic advice and counsel to meet growing demand for its award winning products and to further grow its market share in the enterprise mobility security space. Ken Tyminski has been named the board's chairman. He is an IT veteran with more than 30 years of experience focused on information security and risk management.

The Commercial Advisory Board will also include other industry and enterprise information security experts that will work closely together to leverage their technical knowledge, entrepreneurial experience and corporate information management expertise to help Air Patrol meet emerging market requirements.

“Ken brings the type of proven, hands on experience that will be of immediate benefit to AirPatrol and with more than 30 years in the industry is uniquely qualified to deliver strategic advice to the board,” said Ozzie Diaz, CEO, AirPatrol Corporation. “Today, cyber threats are evolving faster than most companies have time to digest, throwing out conventional means of security and opening new and exciting business opportunities for AirPatrol.”

Tyminski recently served as vice president and chief information security officer for the Prudential Insurance Company of America, where he was responsible for ensuring that Prudential's business systems were architected appropriately, implemented securely and protected from malicious outsiders and insiders. He also led the Information Security Office for Prudential, which established policies, standards and ensured controls were in place for millions of users, thousands of branches and hundreds of offices across the country and internationally.

Tyminski is well known in the information technology industry as a visionary, strategic thinker and early adopter. He has served on the advisory boards of several companies and speaks frequently at conferences and symposiums.

“AirPatrol offers the wireless, mobile security market a unique and proven way to lock down both WLAN device and cellular device security in one system, creating a channel of growth for the business, while continuing to provide Fortune 1000 companies with a robust and cost-effective way to lock out cyber criminals,” said Tyminski. “I look forward to working with Ozzie and the advisory board to make strategic decisions that benefit AirPatrol and its continued growth and visibility in the wireless security industry.”
