

## **AirPatrol Corporation CEO Ozzie Diaz to Speak at Upcoming Information Week/Dark Reading Virtual Security Event**

**Columbia, MD—March 23, 2010**—AirPatrol Corporation, a leader in wireless threat management solutions, today announced that CEO Ozzie Diaz will be speaking at the *Information Week/Dark Reading.com* virtual security event titled “Security: Strengthening IT Security’s Weakest Link: End Users,” Wednesday, March 24, 2:30 p.m. – 3:30 p.m. ET.

Joining Diaz on the panel titled “Arming The Road Warrior: New Strategies For Securing Mobile And Remote Workers,” will be Chris Nickerson, CEO Lares Consulting and Tim Wilson, moderator and editor-in-chief, *Darkreading.com*.

In this insightful (and perhaps controversial) presentation, a panel of leading security experts will offer their views on the most common threats and vulnerabilities posed to today's mobile workers. The experts will offer a look at security issues surrounding wireless networking, laptop PCs, smart phones, PDAs, and portable storage devices, and they will offer some actual data on how those devices are used (and abused) by employees on the road. In addition, the panel will discuss the most promising best practices and technologies for securing portable and wireless devices and networks – and how your organization can take steps to protect mobile systems, users, and data.

### **About AirPatrol Corporation**
