

**FOR IMMEDIATE RELEASE**

**AirPatrol Corporation Joins ‘Securing Our eCity’ Coalition**

**Columbia, MD—March 22, 2010**—AirPatrol Corporation, a leader in wireless threat management solutions, today announced it has joined the ‘Securing Our eCity’ (SOeC) coalition as the designated supplier of wireless security and threat management products. Based in San Diego, the coalition’s goal is to promote cyber security awareness, education and solutions for San Diego businesses, schools, municipal and law enforcement agencies.

“AirPatrol is thrilled to be involved with Securing Our eCity not only because of the organizations already involved, but because of our own cyber security efforts to root out hackers and criminals from stealing proprietary information from unsuspecting consumers, corporations and governmental agencies,” said Ozzie Diaz, CEO, AirPatrol Corporation. “At AirPatrol, our award-winning Wireless Locator System, Wireless Policy Manager and Rapid Deployment Sensor provide enterprise customers with a safe and productive environment.”

SOeC is building relationships with companies such as AirPatrol to educate and help prevent cybercrimes from happening. Many public and private organizations are participating in SOeC, including AT&T, BAE, Barney & Barney, ESET, F5, Intuit, PacBell, Raytheon, SAIC, Sempra, Websense and Wells Fargo. In addition, many civic organizations such as San Diego’s Regional Chamber of Commerce, police department, police foundation and Better Business Bureau are also participating. The Department of Justice is also involved.

“The pervasiveness of cyber threats makes securing communications essential,” said Darin Andersen, COO, ESET. “Working with a company such as AirPatrol can help local businesses and organizations avoid becoming the next victim of a cyber crime. AirPatrol has a list of best practices and methodologies in their products that help secure some of the biggest corporations in the world. Their expertise in corporate networks makes them an essential partner.”

“With Internet-based attacks continuing to grow that threaten national and personal security, it is becoming more important than ever to stay one step ahead of cyber criminals,” said Jerry Sanders, Mayor of San Diego. “The key to helping individuals,

families and businesses protect themselves from cyber attacks is through increased education. By partnering with public and private efforts in our own backyard, like Securing Our eCity, we are able to move closer towards our goal of making San Diego the nation's safest cyber city and a model for the rest of the country.”

#### **About Securing Our eCity**

Securing Our eCity is a public and private partnership of concerned stakeholders, including consumer advocates, business owners, governmental agencies (law enforcement and legislative bodies) to better educate and protect the public against cyber threats. Through general awareness, educational programs, the deployment of modern security technologies and solutions, and coordination of the legislative and law enforcement agencies, the Securing Our eCity initiative will counter the rapidly growing wave of malintended cyber activity.
