AirPatrol WPM 2.0 Now Integrates with McAfee ePolicy Orchestrator platform 4.5 and 4.6 *Customers to Continue Benefiting from Extension of ePolicy Orchestrator platform Capabilities into the Wireless Domain*

Columbia, MD – July 25, 2011 – [AirPatrol Corporation](http://www.airpatrolcorp.com) is pleased to announce the completed integration of its Wireless Policy Manager (WPM) with McAfee® ePolicy Orchestrator® (McAfee ePO™) software versions 4.5 and 4.6. WPM secures wireless interfaces on enterprise endpoints and empowers IT administrators to easily enforce common-sense rules on governing how employees use their wireless connectivity.

“We are proud to be part of the McAfee Security Innovation Alliance and partner with McAfee,” AirPatrol’s CEO Dennis Pollutro explained. “In this time of an ever-increasing need for strong and pervasive security, we are happy to extend McAfee’s superb security management framework into the wireless domain.”

The integration of AirPatrol WPM with McAfee ePO platform 4.5 and 4.6 extends the capabilities of the McAfee ePO platform into the wireless domain, giving network administrators the ability to manage, distribute and enforce wireless network policies from a central management console. With AirPatrol WPM, organizations can secure their valuable laptops and PCs against today’s wide range of mobile and wireless threats, such as the prevention of multi-homing.

“The integration between AirPatrol WPM with ePolicy Orchestrator platform further enhances endpoint security for our mutual customers,” said Ed Barry, vice president of the Security Innovation Alliance, McAfee. “We are pleased to see AirPatrol complete their integration with the latest versions of McAfee ePO software.”

McAfee ePO software is the industry-leading security management platform. With its single-agent and single-console architecture, McAfee ePO software provides intelligent protection that is automated and actionable, enabling organizations to reduce costs and improve threat protection and compliance. In 2009, McAfee Security Innovation Alliance awarded AirPatrol the Most Innovative Technology Partner for its integration with McAfee ePO software 4.0.

Later this week, on Thursday, July 28th at 2pm ET, AirPatrol's Chief Technology Officer Tom Kellermann will participate in a webinar, [“The Evolution of Espionage in Cyberspace.”](http://www.airpatrolcorp.com/webinars/webinar_espionage_July282011.php) He will be joined by Joel Brenner, former head of US counterintelligence under the Director of National Intelligence, and L-3's VP of Cyber Strategy, Scott Aken, to discuss industrial espionage in cyberspace. To register for this webinar, please visit: http://www.airpatrolcorp.com/webinars/webinar_espionage_July282011.php

About AirPatrol Corporation

AirPatrol is the first and only security technology that can continuously monitor any mobile device on cellular and wi-fi channels in an enterprise, determine its compliance with security policy, enforce that policy in real time and dynamically adapt the device's capabilities for the situation regardless of who the user might be. AirPatrol offers a comprehensive suite of location-based management solutions that enable clients in the government, financial, healthcare, corporate and retail sectors to keep pace with the expanding security requirements of an increasingly mobile world. www.airpatrolcorp.com.
