## **Cenzic and AirPatrol Partner To Provide Comprehensive Security As The Consumerization Of IT Grows**

*Leading Location-Aware Enterprise Mobility and Web Application Security Companies Collaborate on Enterprise Security Strategies*

**CAMPBELL, CA and COLUMBIA, MD – June 30, 2011 --** [Cenzic](#) Inc., the leading provider of Web application security assessment and risk management solutions and [AirPatrol](#) Corporation, a leader in wireless threat management solutions, today announced a partnership that will allow AirPatrol to offer Cenzic solutions to its customers along with its mobile solutions.

“One of the major issues with the [consumerization of IT](#) is security. Both mobile security and Web application security are top of mind for most enterprises and government agencies,” said Glenn Gramling, VP of business development for Cenzic. “This partnership allows AirPatrol to add Cenzic’s solutions to its portfolio along with mobile security and help customers with the two most critical security issues.”

Recent attacks including Sony, Fox News, Nintendo, Sega, U.S. Senate, and Citibank are raising awareness around [Web application security](#). For organizations looking to protect themselves, Cenzic offers a suite of solutions ranging from their award-winning Hailstorm Enterprise ARC software to ClickToSecure Cloud, the industry’s first true cloud offering for Web application security allowing users to test their websites for vulnerabilities and conduct quick and cost-effective assessments entirely in the cloud.

"With the explosion in malware targeting mobile phones and the widespread increase in attacks on web applications, Cenzic and AirPatrol Corp. have joined forces," said Tom Kellermann, CTO for AirPatrol Corp. "This partnership is fundamental in order to protect mobile banking and remote access from digital insiders that can reside on tablets and smart phones. Continuous monitoring and location based management of mobile devices coupled with a secure web application is paramount to sustainability."

### **About AirPatrol Corporation**

AirPatrol Corporation is the most trusted authority on mobile and wireless threats to enterprises. The company's comprehensive suite of location-based products help security administrators in the government, financial, healthcare, corporate enterprise and retail industries keep pace with the expanding requirements of an increasingly mobile world. For more information, please visit the company's website at [www.airpatrolcorp.com](http://www.airpatrolcorp.com).

### **About Cenzic**

Cenzic, a trusted provider of software and SaaS security products, helps organizations secure their websites against hacker attacks. Cenzic focuses on Web Application Security, automating the process of identifying security defects at the Web application level where more than 75 percent of hacker attacks occur. Our dynamic, black box Web application testing is built on a non-signature-based technology that finds more "real" vulnerabilities as well as provides vulnerability management, risk management, and compliance for regulations and industry standards such as PCI. Cenzic solutions help secure the websites of numerous Fortune 1000 companies, all major security companies, leading government agencies and universities, and hundreds of SMB companies -- overall helping to secure trillions of dollars of e-commerce transactions. The Cenzic solution suite fits the needs of companies across all industries, from a cloud solution (Cenzic [ClickToSecure Cloud™](#)), to testing remotely via our managed service (Cenzic [ClickToSecure® Managed](#)), to a full enterprise software product (Cenzic [Hailstorm® Enterprise ARC™](#)) for managing security risks across the entire company.
